

HELICAL PILE SYSTEMS

Aerial Access Project

In July of 2014, Cyntech provided deep foundation Helical Piles as a subcontractor for PCL Construction. The project was at the Sheraton Hotel in Red Deer, Alberta. In 6 days twenty-seven 25' and 31' foot piles were installed in the courtyard of the Sheraton Hotel. The Red Deer Sheraton wanted their outdoor pool to be converted into an indoor pool for guests. The area had zero surface access and required aerial access for all materials and equipment. The soft ground and requirements for no soil disruption, and no heaving during the winter months, helical piles were the ideal solution for this foundation issue
